USACE Progress Report

Attachment 3 – Excerpt from March 2006 USACE Progress Report

There was a meeting held at Former ERRO / current BAO Aberdeen Resident Office on 9 January 2006. L.C. Maurer provided a copy of the Draft Technical Report / Final Report to Charles Fitzsimmons at that time. Back in August 2005 it was decided that the report would be issued as a Technical Report because the project had been turned over to the PRP. It was decided that the report would just be an executive summary type report of what happened at the site and the decision making process. The report has the test and analytical data and the daily reports as attachments in CD ROM form. Mr. Fitzsimmons did not decide in January 2006 to have the report reviewed, revised, or turned over to the PRP as it was issued. Charles Fitzsimmons said he would review the document first before making up his mind.
